Professional Summary

Motivated MCA student and Full Stack Developer with hands-on experience in React.js, Python, Django, Node.js, and REST APIs. Built responsive web applications and completed an internship in algorithmic trading with real-time API integration. Skilled in frontend and backend development, database management, and problem solving. Microsoft Certified in Azure Fundamentals and Power BI.

Technical Skills

- **Languages:** JavaScript, Python, Java(basics)
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Design, React Hooks, State Management, Component-based Architecture
- **Backend:** Node.js, Express.js, Django, REST API, Web Application Development
- **Database:** MongoDB, MySQL, Database Management
- **Tools:** Git, GitHub, VS Code, Version Control, Deployment
- **Concepts:** Full Stack Development, Agile, Problem Solving, API Integration, Algorithmic Trading, Stock Market Prediction
- **Cloud/BI:** Microsoft Azure (AZ-900), Power BI, Cloud Computing, Business Intelligence

Experience

Student Intern LYD Technologies

- Developed stock market prediction features using OpenAlgo by analyzing real-time market trends and historical data.
- Integrated REST APIs to fetch and display live stock market data for trading and analysis dashboards.
- Utilized **Python** for backend data processing pipelines to identify market patterns and support algorithmic trading strategies.
- Assisted in designing automated trading logic using Agile practices and strong problem-solving approaches.
- Gained end-to-end full stack web application development experience including API integration and data-driven decision making.

Projects

Cyber Crime Awareness Portal (Final Year Project - BCA) *Django, HTML5, CSS3, JS*

- Developed a full stack web application to educate users about cybersecurity threats using Django backend and responsive frontend.
- Implemented emergency alert system and real-time threat reporting with database management via Django ORM.
- Applied component-based architecture and version control (Git) throughout the development lifecycle.

React Todo Application *React.js, JavaScript, State Management*

- Built a task management web application using React.js with React Hooks and component-based architecture for state management.
- Implemented full CRUD operations with local storage persistence and responsive design for cross-device compatibility.

API Data Fetching Application *React.js, JavaScript, REST API*

- Built a dynamic web application using React.js to fetch and display real-time data from REST APIs using fetch/axios.
- Designed responsive UI with asynchronous data handling and clean component-based architecture.

Certifications

- **Microsoft Azure Fundamentals (AZ-900)** — Microsoft | Cloud Computing
- **Microsoft Power BI Data Analyst** — Microsoft | Business Intelligence, Data Visualization

Education

Master of Computer Applications (MCA) Expected 2027
Kristu Jayanti University (Deemed to be University)

Bachelor of Computer Applications (BCA) Completed 2025
Koshys Group of Institutions CGPA: 8.78 | Grade: A+

Languages

English • Hindi • Kannada • Telugu
